

STARING MOTARCONVEYOR

>> Remember Staring product is well known for their good quality and long life

Staring Motarconveyor

Conveyor for loading a forced-flow mixer.
The mortar conveyor is highly suited for loading the following materials:

- Gravel
- Concrete
- Soil
- Rubble
- Sand
- Excavations in a basement with a narrow accessibility or other inaccessible places.

Miniveyor is ideal equipment for post disaster debris removal where the situation is weight sensitive, i.e. it would be possible to put Miniveyor down whilst minimising the risk of crushing people who might be trapped underneath. Tons of rubble could be quickly removed, even hand loading material onto the portable conveyor belts. The Miniveyor portable conveyor system has been used on many natural disasters, such as post hurricane and earthquake recovery and crime scene investigations worldwide
