

STARING SILO SYSTEM 1,2-2,0M³

NEWS

>> Remember Staring product is well known for their good quality and long life

Staring SILO SYSTEM

The Staring Silo System for filling from Big Bags is suitable for small building sites. The system is developed for building projects where bag filling is too slow and often too expensive and where the large silos may be too large both as regards the content and the physical size.

The silo contains 1.7 m³ and is supplied with feed screw conveyor and is further available with the following equipment:

Weighing system with automatic feed screw control.
With or without printer port.

Water dosage which may be connected to the weighing system or run separately.

Vibrator to prevent bridges.

Vacuum cleaner for dustless filling of the mixer and/or silo.
