for their good quality and long life

Staring SM 320 ERGO

STARING SM 320 ERGO is a new and ergonomically designed mixer.

The mixer is special because the mixing pan can be raised or lowered during mixing. This makes you able to fill it up at a very low height and at the same time you can empty it into a regular wheelbarrow.

With the new SM 320 ERGO mixer there is no need for a belt conveyor. You start up the mixer and lower it to a minimum.

Fill it up with the material and let the mixer go back up.

The material will be mixed and when the mixing pan reaches the top the mixture is ready for discharge.
